# Getting to know your Extendable Track

Fixed roller slot — position latch — bracket mount slit — J-roller track — carrier — motor socket *one in each end of the track*

debris cover

J-roller

fixed roller

mount a

mount b

wall mount

mounting screw and drywall anchor

wall mount bolt

## Distance guide

**Ceiling mount**
If installed against a wall, make sure to **leave enough space for the curtain folds.** Leave the same distance in double track installations to avoid blocking the carrier movements.

x: 1.5 to 3.0 inches
   4.0 to 7.5 cm

**Wall mount**
Make sure to **leave enough space for the curtain folds.**

y: 1.0 to 1.5 inches
   3.0 to 4.0 cm

# Mounting on different kinds of materials

**Attention:** Each wall and ceiling material requires a specific type of mounting screws which may not be included in this kit. Consult your local hardware store if you are not sure which is appropriate for you.

## Anchoring guide

### Drywall Mounting

If mounting onto drywall at **maximum** extension with max weight, it is recommended to use **2 mounts a** on each side equally spaced with **1 mount b** in the middle.

If mounting onto drywall with the **minimum** extension, it is recommended to use at least **4 mounts b**, one on each end and 2 equally spaced from the ends.

**Note:** Any length in between the max and minimum extension will require a mix of **mounts a and b**.

### Stud Mounting

If mounted to a wood beam or stud at maximum extension, **1 mount a** on each side and **2 mounts a** closer to the center, a total **4 mounts a** will be sufficient.

If mounted to a wood beam or stud at **minimum** extension, it is recommended **3 mounts b**, one on each side and one at the center.

## Caution

**The number of ceiling mounts will vary depending on the extended length of the track, the weight of the fabric to be used as well as the surface being mounted on.**
It is perfectly acceptable to use all the supplied ceiling mounts.

# Go Smart Curtains Track specifications

**CUR-PLU-FR-3M, CUR-BAT-FR-3M, CUR-SMA-FR-3M**

**Length (min. to max. extension):** 1.7m to 3m (66.5in to 118in)

**CUR-PLU-FR-4M, CUR-BAT-FR-4M, CUR-SMA-FR-4M**

**Length (min. to max. extension):** 2.2m to 4m (86.5in to 157.5in)

## Disposal

Do not dispose of these items with your regular waste. Please recycle damaged products according to local regulations.

**9.** Properly fasten the wall mounting brackets to the wall, be sure it is, **in line and levelled with one another. Attach the track**, which already has the mounts a and b properly assembled, to the wall mounts **using the provided nut, bolt and washer**.

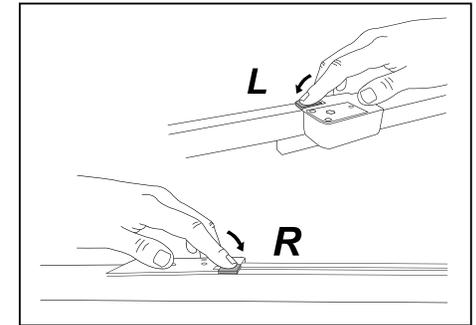

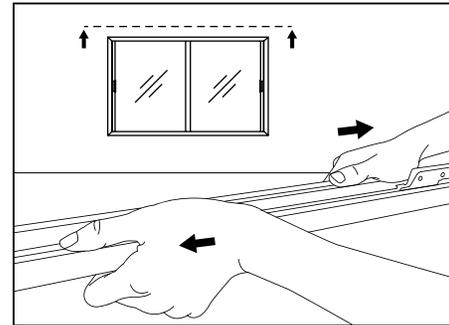

**10.** Hang your curtains by inserting its hooks in the fixed roller, the j-rollers and lastly, in the carrier.
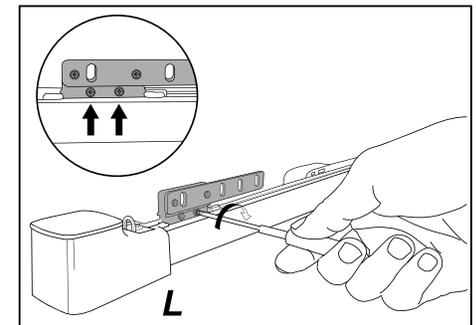

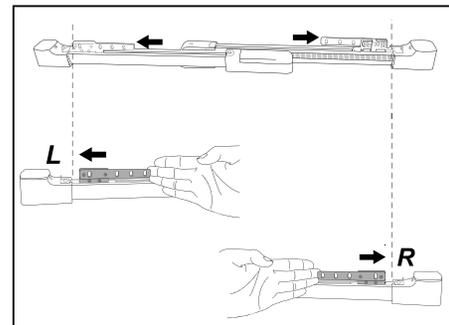

# Installation

**1.** Loosen the two screws located on the left carrier, then open both latches located at the right and left ends of the track.

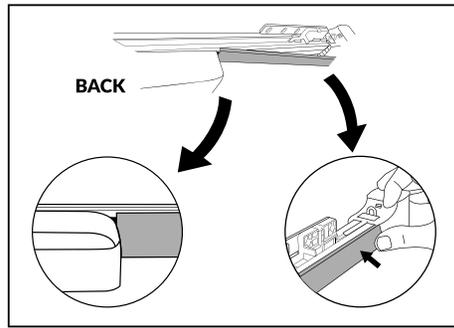

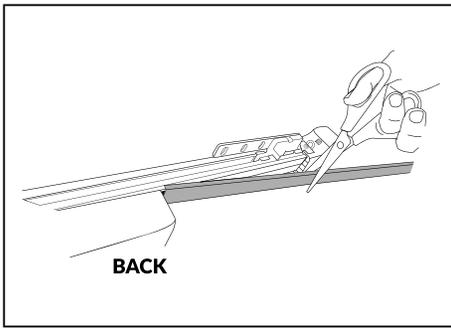

**2.** Extend the track to the desired length. It's recommended to extend the track **at least 25cm (10in) past each side of the window**. Lock the left and right latches.
**Note:** If you decide to change the length of the track, ensure to redo steps 1 and 2 to avoid any gaps at the end of the tracks.

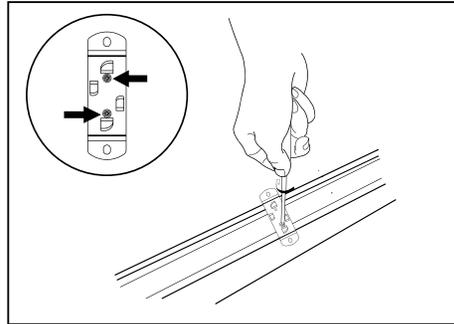

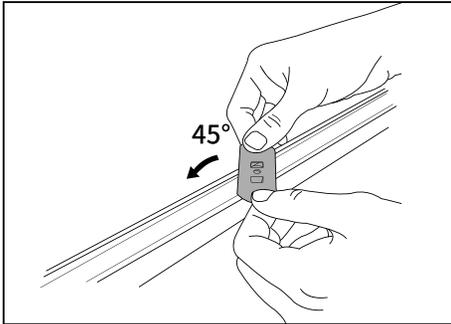

**3.** Move the left and right carries to their end position and tighten the two screws in the left carrier.
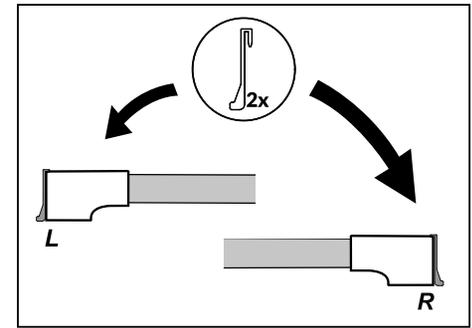

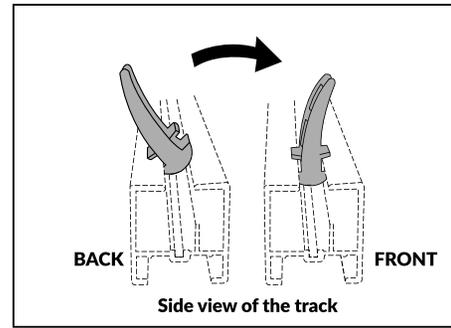

**4.** Measure the length of the exposed belt and cut the plastic debris cover to the proper size. Then, snap on the debris cover over the exposed belt. **Keep the remaining cover in case the track will need to be extended in the future.**

**5.** Mounts should be placed **about 50cm (20in)** apart or at the same spacing between studs or beams of your construction. Keeps mounts **at least from 1cm(6/16in)** of each end side of the track, but **no more than 2cm(13/16in)**. For more information, please refer to the **anchoring guide section below**.
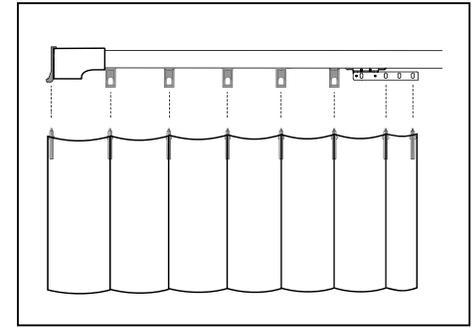

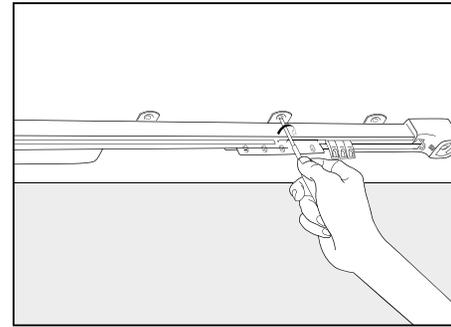

**6.** Insert the mount on the track at an angle of 45 degree, then turn it counterclockwise until it is perpenvdicular to the track. Repeat this process until all mounts necessary to the installation are in place. **Tighten the middle screws of  mounts b.**

**Side view of the track**

**7.** Count **how many hooks you need** to hang one curtain panel. Insert the same **quantity minus 3 of J-rollers** in each side of the track. Place **one fixed roller at each end of the track**.
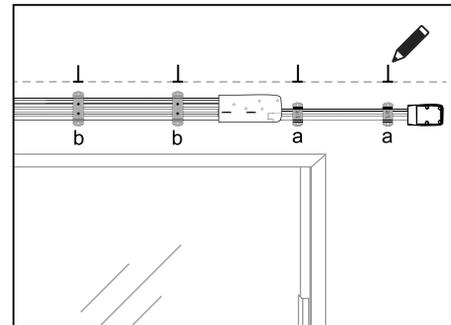

## Ceiling mounting installation

**8.** If installed against a wall, make sure to **leave enough space for the curtain folds** (1.5-3in/4-7.5cm). Hold the track in place and, using the appropriate screws for your ceiling material, tighten them.

**9.** Hang your curtains by inserting its hooks in the fixed roller, the j-rollers and lastly, in the carrier.

## Wall mounting installation

**8.**Use the mounts a and b you installed to your track to mark the position where the wall mounts will be installed. If using the studs to anchor the wall mounts, you may need to slightly adjust the track length and/or mounts positions. Please refer to the **anchoring guide** section.
